

IT'S A BIT LIKE BEING WHAT  
YOU'RE GOING TO BE -  
BEFORE YOU ARE.

Here's just about  
everything we'd like  
you to know about  
Student Membership  
in the CSEG:

Doodletrain  
CSEG lecture tour  
DISC lecture tour  
Recorder Magazine  
University Student Newspaper  
GeoConvention  
Technical Talks  
Microseismic Workshops  
Lunchbox Geophysics  
Junior Geophysicists Forum  
CSPG Honorary Address  
GeoSkills  
CSEG Scholarship Trust Fund  
CSEG Mentoring Program  
Academic scholarships and awards  
Sponsorships to events

How to Get  
Up Close &  
Geophysical  
With Your Profession:

CANADIAN SOCIETY OF  
EXPLORATION GEOPHYSICISTS

## Get some Professional Insights & Recognition

You're welcome to attend information-rich events and rub shoulders with professional members. Forums include technical talks, microseismic workshops, technical luncheons and what we call lunchbox geophysics. Additionally, there are the Doodletrain courses, webcasts, the CSEG Symposium and the Distinguished Instructor Short Course (DISC) lecture tours, plus our annual convention in Calgary.

Costs range from free to cheap. Visit [CSEG.ca](http://CSEG.ca) and pull down the Education menus. Or just Google items by name.

## Attend some Events with go-to Pros

We all need access to some good go-to people. So here are three easy ways to broaden your network and expand your perspective of the Geosciences: attend the Junior Geophysicists Forum, the CSPG Honorary Address and the GeoSkills student-industry training day & mixer. Previous participants enjoyed these events and made some valuable connections.

## Have some Fun with Professional Amateurs

As a student member of CSEG, you're qualified to curl (Doodlespiel), golf (T-wave and Doodlebug), ski (Ski-spree), play squash and run a 10-K road race ... didn't you know? Seriously, come on out and have some fun with professional members. It's surprising how the sporting spirit can help you build your network.

## Enjoy the Fruits of Merit

The CSEG offers some excellent University Outreach programs, Inter-university geoscience conferences, sponsorships, the distinguished lecturer series, academic scholarships and awards. The CSEG Scholarship Trust Fund awards annual scholarships to geophysics students from universities across Canada. We encourage you to check out these opportunities and consider participating.

We also highly recommend our mentorship program. Mentoring can be an amazing, relationship-based roadmap for customizing your career to best suit you and your professional goals. Details about these opportunities and programs – along with application forms – are at [CSEG.ca](http://CSEG.ca)

## Experience a Day in the Life of a Geophysicist

Want to see what really goes on behind the scenes? Join the CSEG and take a field trip. Check out actual geophysical applications in the energy industry. Wander through acquisition, processing and interpretation companies. Look over the shoulders of professional Geophysicists at work. The Geophysical Industry Field Trip (GIFT) is as up close and personal as you can get.

This CSEG University Student Outreach event occurs every summer in Calgary. It's a full day and includes breakfast, lunch and a mixer in the evening.

## A little Insider Knowledge can take you a Fair Way

Yes, we know: Insider Knowledge can be both good and bad. This is the good stuff. As a CSEG member, you'll receive the Recorder Magazine and the University Student Newsletter.

The Recorder keeps you abreast of applied technologies in geophysics. It's also a Who's who of the people and organizations that are shaping our profession in Canada. The Newsletter is crafted to address the interests of CSEG students. It gives you the latest on what's available, how to participate and where to get more information.
